Marsh Marigold and Christmas Fern

We Propagate and Grow Our Own Wildflower Plants

IN OUR nursery we have many acres of woodland with an almost unbelievable variation of soil and moisture conditions, so that our tiny plants, when taken from the seed beds where they have been allowed to germinate, are placed in their natural habitat, where they thrive without the aid of glass protection or artificial shade. The wildflower plants, when they come to you, have been transplanted several times and therefore are well developed. Plants are guaranteed only when planted by us.

Most wildflowers require many years of our care before they reach maturity and can safely be relied upon to give you joy for the years to come. Some seeds take two to seven years to germinate. The common Jack-in-the-pulpit is slow developing, but may thrive for twenty-five or thirty years. Most of our ferns are at least five years old before we send them to you or transplant them to your garden.

Glorious

WILDFLOWERS

NATURE spread a glorious carpet in her forest ablaze with the brilliant colors of choice shrubs, red, purple, blue, and white berries and thousands upon thousands of fairy-like wild flowers and dainty ferns. Through the ages much of this beauty has been destroyed. You may now restore your own shady spot or bit of woodland by calling Vick's Wildgardens.

Enchanting

FERNS

Nursery Grown Wildflowers

All prices quoted on wildflowers and ferns include shipping charges east of the Mississippi River.

Alumroot

Interesting, short stemmed foliage, forms splendid ground cover. Inconspicuous flower rising on long stem appears between May and August. Native of dry woodland from Canada to Alabama.

30c ea. \$3.00 per 12 \$22.50 per 100

Alumroot

Anemone, Rue

This fairy-like, white flower, appearing from March to May, is so dainty it would seem that it must perish in the sharp winds of late spring, but is a very hardy and an extremely satisfactory plant. Grows naturally in the deep woods from New Hampshire to Minnesota.

30c ea. \$3.00 per 12 \$22.50 per 100

Anemone, Rue

Anemone, Tall; Thimbleweed

This beautiful plant deserves great popularity. Its dainty, white blossoms appear during May, June, July and August. It grows naturally in open, dry woods or thickets from Canada to South Carolina.

30c ea. \$3.00 per 12 \$22.50 per 100

Anemone, Tall

Arbutus, Trailing, Mayflower

The delicate beauty of this rare plant has fascinated flower lovers for generations. It must have extremely acid soil. Grows close to the ground and ultimately forms a solid mat of rich, dark green leaves which are evergreen. The shell-pink blooms appear in April and May. Grows naturally in the loose soil of woodlands from Canada to Florida. Because of an unknown bacteria which should be present in the soil this flower proves difficult to raise.

45c ea. \$4.50 per 12 \$32.50 per 100

Arbutus

Arrowhead

One of our most beautiful aquatic plants. White blooms appear from July to September. Long popular for shallow pools and lily ponds.

30c ea. \$3.00 per 12 \$22.50 per 100

Arrowhead

Aster, New England

This magnificent, rich purple aster makes a grand show in the moist meadows and bogs blooming from late August to October. Is native from Canada to Alabama, west to Colorado. Grows 3 to 3½ feet high.

30c ea. \$3.00 per 12 \$22.50 per 100

Aster, New England

Baneberry, Red

A handsome plant throughout the summer. Dainty, lace-like, white blooms appear April to June and are later followed by bright red fruit. Native of woodlands from Canada to Pennsylvania.

30c ea. \$3.00 per 12 \$22.50 per 100

Baneberry

Nursery Grown Wildflowers

Bedstraw

Baneberry, White

Similar to the Red Baneberry, but bearing white berries tipped with purple.

30c ea. \$3.00 per 12 \$22.50 per 100

Bedstraw

A rather attractive plant with a dainty, white bloom appearing May, June, July, and August. Can be used to an advantage on extremely rocky and steep banks in the woods where plant care is impossible. It should never be planted where other plants are expected to thrive.

30c ea. \$3.00 per 12 \$22.50 per 100

Bellwort, Large-flowered

This fascinating plant usually grows 6 to 18 inches high. The bell-shaped flowers are a rich yellow and appear during April and May. Native of the rich woodlands from Canada to Georgia.

30c ea. \$3.00 per 12 \$22.50 per 100

Bellwort

Belwort, Sessile-leaved

This rather rare, delicate, nodding, yellow bell-shaped flower grows best along stream banks where there is occasional silt deposit. Flower stem grows 4 to 12 inches high from Canada to Georgia and blooms usually in May.

30c ea. \$3.00 per 12 \$22.50 per 100

Sessile-leaved Bellwort

Bee Balm, Bergamot; Oswego Tea

Plant 2 to 4 feet high. Bright red flowers appearing July and August. Native of stream banks from Canada to Georgia. Makes a grand mid-summer show in proper places but should not be planted in limited areas.

30c ea. \$3.00 per 12 \$22.50 per 100

Bee Balm

Bergamot

Bergamot, Wild

Usually grows about 2 feet in height. Attractive, pale, lavender blooms appearing June to September make a beautiful display on dry, open hillside. Should not be planted near cultivated garden. Native from Maine to Florida.

30c ea. \$3.00 per 12 \$22.50 per 100

Bishop's Cap

Native of deep rich woodlands from Canada to North Carolina. Stems 8 to 17 inches in height. Tiny white flowers bloom during April and May.

30c ea. \$3.00 per 12 \$22.50 per 100

Bittersweet

Very attractive, woody vine bearing ornamental, orange scarlet berries in the fall. Native of eastern United States, will live in woodland shade but grows more luxuriantly and bears more prolifically in the open sun.

50c ea. \$5.00 per 12 \$35.00 per 100

Bittersweet

Bishop's Cap

Nursery Grown Wildflowers

Bloodroot

Bloodroot; Puccoon-Root

This spring favorite is a native of rich, wood soil from Canada to Florida. Its 1 to 1½ inch, white blooms rising above broad, light green leaves are an addition to any garden. It blooms in April and May.

30c ea. \$3.00 per 12 \$22.50 per 100

Blue-eyed Grass

Deep blue flower appearing May, June, and July. Native of rich, lowland woods, or moist, open fields from Newfoundland to Virginia and westward to Colorado.

30c ea. \$3.00 per 12 \$22.50 per 100

Pot Grown

50c ea. \$5.00 per 12 \$35.00 per 100

Blue Cohosh

Blue Cohosh

Usually 1 to 2½ feet high. Shallow rooted. Excellent ground cover in woodland. Will form thick mats on top of huge rocks. Dainty, blue flowers appear in April and May. Native from Canada to South Carolina.

30c ea. \$3.00 per 12 \$22.50 per 100

Boneset, White or Common

Showy white flowers appear July, August, and September, borne on a 2 to 5-foot stem with rough, dark green leaves. Grows naturally in wet lowlands, moist meadows, and bogs, Canada to Florida. Excellent for distant meadow but coarse for intimate plantings.

35c ea. \$3.25 per 12 \$23.50 per 100

Bowman's Root

Bowman's Root; Indian Physic

This fascinating plant grows 2 to 4 feet high. Is most attractive when the white blooms appear in June and July. Native of the woods from Canada to Georgia.

30c ea. \$3.00 per 12 \$22.50 per 100

Buttercup, Swamp or Marsh

One of the most colorful of our bog plants. Luxurious foliage. Golden yellow flowers April, May, June, July. Native of swamps and wet meadows from Canada to Georgia.

30c ea. \$3.00 per 12 \$22.50 per 100

Butterfly Weed

Butterfly Weed; Pleurisy Root

One of the most spectacular of all wild flowers. Plant 1 to 3 feet high. Brilliant orange blooms appearing during July, August, and September. Native of dry, open fields from Maine to Florida.

30c ea. \$3.00 per 12 \$22.50 per 100

Swamp or Marsh Buttercup

Nursery Grown Wildflowers

Wild Carnation

Carnation, Wild

An importation from Europe which has naturalized over a wide area. An attractive, small, red, single bloom on a stem 12 to 14 inches high. Prefers dry, sunny locations.

30c ea. \$3.00 per 12 \$22.50 per 100

Clematis, Wild; Virgin's Bower

Fascinatingly dainty vine, is very hardy. Blooms profusely and grows rapidly. Flowers July, August, September. Prefers full sun and is native from Canada to Georgia.

50c ea. \$5.00 per 12 \$35.00 per 100

Clintonia, Yellow; Dogberry

Low plant, seldom growing over 12 or 15 inches in height. Beautiful, thick, green leaves. Small, yellow flowers, followed by blue berries, appear in May and June. Is native from Canada to North Carolina.

30c ea. \$3.00 per 12 \$22.50 per 100

Wild Clematis

Yellow Clintonia

Columbine, Wild; Rock Bells

Colorful and dainty, charming combination of red flowers tipped with yellow and delicate, small, light green leaves. Very satisfactory. Native of rocky woodlands from Canada to Florida.

35c ea. \$3.25 per 12 \$23.50 per 100

Pot Grown

50c ea. \$5.00 per 12 \$35.00 per 100

Coneflower

Columbine

Coneflower

Handsome plant sometimes from 9 to 12 feet in height. Has a golden yellow bloom appearing July, August, and September. Native in moist, open woods and along stream banks.

50c ea. \$5.00 per 12 \$35.00 per 100

Dog's-tooth Violet; Trout Lily

This violet is actually a member of the lily family. Interesting, mottled leaves. Yellow flower appearing in April and May. Native in wet woods and along shady stream banks from Canada to Florida.

30c ea. \$3.00 per 12 \$22.50 per 100

Dog's-tooth Violet
Trout Lily

Dutchman's Breeches

A delicate plant with dainty, fernlike leaves and graceful white blossoms which appear in April and May. Native in the rich woodlands from Canada to North Carolina, westward to Missouri.

30c ea. \$3.00 per 12 \$22.50 per 100

Dutchman's Breeches

Nursery Grown Wildflowers

Larger Blue Flag

Everlasting

Interesting ground cover for dry, barren hilltops, silvery foliage and white, wooly blooms appear July and August. Native throughout the United States.

30c ea. \$3.00 per 12 \$22.50 per 100

Everlasting

Flag, Larger Blue

This splendid violet-blue iris blends beautifully with a natural setting. Plant stands 2 to 3 feet in height. It is a native of swamps, bogs, and wet meadows from Canada to Florida.

30c ea. \$3.00 per 12 \$22.50 per 100

Foam Flower; False Miterwort

One of the most charming ground covers for deep shade. Dainty white flowers on stems 1 to 4 inches high. Grows naturally in the deep, rich soil of damp woods from Canada to Florida.

30c ea. \$3.00 per 12 \$22.50 per 100

Forget-Me-Not

Forget-Me-Not; Mouse-Ear; Scorpion Grass

Small plant with dainty, blue flowers which appear May to July. Native along slow streams, in bogs, and wet meadows from Canada to Tennessee.

30c ea. \$3.00 per 12 \$22.50 per 100

Foam Flower

Galax

An unusual ground cover for shade and partial shade. Fascinating, rounded glossy leaves. Foliage changes color in the fall. Flowers creamy white spike. Blooms early summer.

30c ea. \$3.00 per 12 \$22.50 per 100

Galax

Gentian, Closed Blue or Blind

This admirable plant, 2 to 4 feet high, has deep, rich blue flowers which appear in August, September and October. Native of wet meadows from Canada to Georgia.

30c ea. \$3.00 per 12 \$22.50 per 100

Blind Gentian

Nursery Grown Wildflowers

Wild Geranium

Geranium, Wild; Wild or Spotted Crane's Bill

The Wild Geranium, with its deeply indented leaf and its lavender, pinkish bloom, always seems to inject just a little gayer note of springtime into the intimate, shady garden. Native of rich woodlands from Maine to Georgia.

30c ea. \$3.00 per 12 \$22.50 per 100

Ginger, Wild or Indian

Excellent ground cover for rocky, shady bank or rocky stream bank beneath woodland shade. Inconspicuous, dark red flowers appear May and April. Native of rich wood soil from Canada to North Carolina.

30c ea. \$3.00 per 12 \$22.50 per 100

Wild Ginger

Grape, Chicken

Rapid growing vine, splendid foliage, smart, tart fruit. Native in the rich wood soil of eastern United States.

30c ea. \$3.00 per 12 \$22.50 per 100

Chicken Grape

Grape, Fox (2 yr. old)

Rapid growing vine. Large, rich fruit unsurpassed for wines and jellies. Native in fertile woods of eastern United States.

\$1.00 ea. \$10.00 per 12 \$80.00 per 100

Hepatica

Leaves, 2 to 2½ inches from the ground, last well through the season and often most of the winter. Delicate blue or pinkish-blue blooms appear above the leaves in March and April. Native of the deep woods from Canada to Florida.

30c ea. \$3.00 per 12 \$22.50 per 100

Pot Grown

50c ea. \$5.00 per 12 \$35.00 per 100

Hepatica

Herb Robert

Herb Robert

Small bright purplish-red flowers, dainty, graceful foliage. Blooms appear in late spring or early summer. Is native of the moist rocky woodlands, Canada to Pennsylvania, westward to Missouri.

30c ea. \$3.00 per 12 \$22.50 per 100

Nursery Grown Wildflowers

Honeysuckle, Trumpet or Coral

A high climber with a most brilliant scarlet flower arranged in clusters with rounded, dark green leaves. Has scarlet berries, ripening in the autumn. Blooms May or June. Native of open woods and lowlands from Maine to Florida.

50c ea. \$5.00 per 12

Indian Cucumber Root

Attractive leaves, whorled on slender stem, 1 to 2½ feet high. Small, yellow flower appears May and June, followed by dark blue fruit. Native of moist woods throughout eastern United States.

30c ea. \$3.00 per 12 \$22.50 per 100

Indian Pipe; Corpse Plant

A ghost-like flower. Stem, leaves, and bloom are white. Appears June to August in deep woods throughout the United States. Lives on decayed, organic matter. Available only in July and August.

30c ea. \$3.00 per 12 \$22.50 per 100

Indigo, Wild; Horsefly Weed

A very showy plant, bright yellow flowers appearing June to September, reaching from 2 to 4 feet high. Leaves are small, dark green. Native of dry and sandy soils throughout United States.

30c ea. \$3.00 per 12 \$22.50 per 100

Iris Cristata

Justly prized creeping iris. Light blue flower appears April and May. Native of the mountains of Virginia, Kentucky and the Carolinas.

30c ea. \$3.00 per 12 \$22.50 per 100

Ironweed

Handsome plant 3 to 9 feet high. Rich, deep purple flowers appearing August to October. Native of open swamps and wet meadows of the eastern United States.

30c ea. \$3.00 per 12 \$22.50 per 100

Jack-in-the-Pulpit

An old favorite beloved by youths and parents alike. Showy green and brown striped hood appears in June followed by a magnificent cluster of shining, red berries. Native of moist woods throughout eastern United States.

30c ea. \$3.00 per 12 \$22.50 per 100

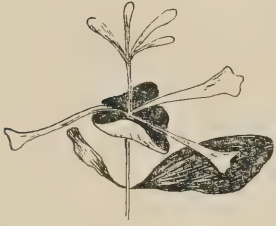

Jacob's Ladder, American

Flowers, mauve blue, appear May, June, and July. Native of wet meadows throughout eastern United States.

30c ea. \$3.00 per 12 \$22.50 per 100

Pot Grown

50c ea. \$5.00 per 12 \$35.00 per 100

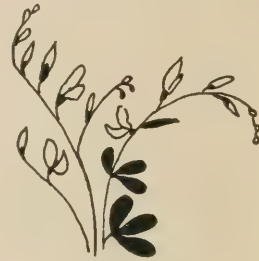

Coral Honeysuckle

Indian Cucumber Root

Indian Pipe

Wild Indigo

Iris Cristata

Ironweed

American Jacob's Ladder

Jack-in-the-Pulpit

Nursery Grown Wildflowers

Joe Pye Weed

Joe Pye Weed; Purple Boneset

A pinkish-purple haze over the meadow when in bloom during August and September, 3 to 6 feet high. Extremely decorative for open, moist ground not in immediate vicinity of more delicate garden. Native throughout eastern United States.

30c ea. \$3.00 per 12 \$22.50 per 100

Lady's-slipper, Pink

Matchless orchid-pink, this bloom appears in June. Requires very acid soil, either sandy or rocky. Native of woodlands, Canada to North Carolina.

45c ea. \$4.50 per 12 \$32.50 per 100

Pink Lady's-slipper

Lady's-slipper, Showy

Pink and white bloom of rare charm. Flowers appear June and July. Native of swamps and open woods, Canada to Georgia, westward to Minnesota.

45c ea. \$4.50 per 12 \$32.50 per 100

Showy Lady's-slipper

Lady's-slipper, Yellow

Gorgeous bit of sunlight from the sky caught in each yellow bloom. Flowers appear May and June. Native of rich, moist woods, Canada to Alabama, westward to Nebraska.

45c ea. \$4.50 per 12 \$32.50 per 100

Yellow Lady's-slipper

Lily, Philadelphia

This stunning lily is one of the most spectacular blooms of the deep woods or open hillsides. Grows 1 to 3 feet in height. Reddish-orange flower appearing in July. Native of woods, Maine to North Carolina.

30c ea. \$3.00 per 12 \$22.50 per 100

Philadelphia Lily

Lily, Turk's Cap

One of the gayest lilies and a profuse bloomer, 6 to 8 feet tall. Excellent for shade or sun. Native of eastern United States.

45c ea. \$4.50 per 12 \$32.50 per 100

Turk's Cap Lily

Lily of the Valley, False or Wild; Two leaved Solomon's Seal

Beautiful ground cover, waxy, green leaves, spikes of tiny, white flowers appearing in May and June. Native of damp woods from Canada to North Carolina, westward to South Dakota.

30c ea. \$3.00 per 12 \$22.50 per 100

Wild Lily of the Valley

Lily, Wild Yellow, Canada or Nodding

4 to 6 stunning deep yellow flowers from a single stalk rising 2 to 5 feet high, blooming in July and August. Native of bogs and wet meadows, Canada to Georgia, westward to Minnesota.

30c ea. \$3.00 per 12 \$22.50 per 100

Wild Yellow or Canada Lily

Lobelia, Blue or Great

Exquisite, blue flowers on 1 to 3-foot spike appear July, August, September, and October. Native of wet meadows and stream banks from Canada to Louisiana, westward to Kansas.

30c ea. \$3.00 per 12 \$22.50 per 100

Pot Grown
50c ea. \$5.00 per 12 \$35.00 per 100

Blue Lobelia

Nursery Grown Wildflowers

Cardinal Lobelia

Lobelia, Cardinal

A glorious blaze of cardinal when the flowers appear in July, August and September. Prefers deep, rich soil throughout a large part of the United States.
 30c ea. \$3.00 per 12 \$22.50 per 100
 Pot Grown
 50c ea. \$5.00 per 12 \$35.00 per 100

Lousewort; Wood or Head Betony

Yellow and brown, chrysanthemum-like flowers appearing April, May, and June. Partially parasitic. Grows naturally in deep woods occasionally throughout the eastern United States.

30c ea. \$3.00 per 12 \$22.50 per 100

Marigold, Marsh; Cowslip

The English cousin of this charming golden flower is known on the other side as the "King's Cup." Belongs at the shady end of your pool. Native of bogs from Canada to Carolina.

30c ea. \$3.00 per 12 \$22.50 per 100

Matrimony Vine

Rapid growing colorful vine. Dainty, orchid-colored blooms appear profusely throughout the summer followed by bright red berries. This plant has a wide distribution in the United States. Is thoroughly naturalized though a native of Europe.

30c ea. \$3.00 per 12 \$22.50 per 100

May Apple; Wild Mandrake

An attractive ground cover for heavily wooded hillside where no other plants are required and a quick cover is imperative. Large, decorative leaves almost hiding white blossoms which appear in May and June followed by an edible fruit. The root is poisonous. This highly valued medicinal plant is native of moist woods, Canada to Florida.

30c ea. \$3.00 per 12 \$22.50 per 100

Meadow Rue, Early

The dainty foliage of this plant is an asset to any spring garden. The blooms are an inconspicuous yellow-green and appear in April and May. Native along wooded stream banks, Maine to Alabama.

30c ea. \$3.00 per 12 \$22.50 per 100

Meadow Rue, Fall

Huge, snowy white, fluffy balls of blooms from July to September borne high on graceful stems with a multitude of dainty, silvery green leaves make this charming plant a sort of fairy green of the summer wild garden. Native of bogs and wet meadows, Canada to Florida.

30c ea. \$3.00 per 12 \$22.50 per 100

Mertensia, Virginia Cowslip

This extremely popular old favorite is ever beautiful. Its blue flowers, which turn pinkish-purple with age, appear in April and May and form a charming contrast with the large, delicate green leaves. It is a native of open, wet meadows from New York State to South Carolina. The foliage disappears, as do all signs of blossoms, before warm weather, so this plant should never be planted in an exclusive bed.

30c ea. \$3.00 per 12 \$22.50 per 100

Lousewort

Marsh Marigold

May Apple

Matrimony Vine

Fall Meadow Rue

Early Meadow Rue

Virginia Cowslip

Nursery Grown Wildflowers

Common Milkweed

Milkweed, Common

The purple blossoms, July to September, form an excellent color effect in distant meadow. Should never be planted in limited garden. Grows from Canada to North Carolina.

30c ea. \$3.00 per 12 \$22.50 per 100

Milkweed, Four-leaved

One of the most delicate and beautiful of all summer-blooming woods flowers. White with dark green leaves. Difficult to transplant. Native of deep woods, Maine to Alabama.

30c ea. \$3.00 per 12

Showy Orchis

Orchis, Showy

Dainty, decorative, small orchid growing only 4 to 12 inches high. Purple and white flowers rising from thick, green leaves appear May and June. Native of the rich woodlands, Canada to Kentucky, westward to Missouri.

45c ea. \$4.50 per 12 \$32.50 per 100

Four-leaved Milkweed

Partridge Berry; Twinberry; Squawberry

An ideal evergreen creeper, flowers, waxy white, blooming in April, May, June, followed by bright red berries. Native of the woods, Canada to Florida.

30c ea. \$3.00 per 12 \$22.50 per 100

Partridge Berry

Phlox, Blue

Light blue flower, 2 to 8 inches high, appears July to September. Should be planted in drifts on gentle wooded slopes. Native from Pennsylvania to Florida westward to Kansas.

30c ea. \$3.00 per 12 \$22.50 per 100

Pot Grown

50c ea. \$5.00 per 12 \$35.00 per 100

Blue Phlox

Pipsissewa, Prince's Pine

Charming evergreen leaves, pink and white, wax-like blooms appearing June, July, and August. Prefers acid soil. Native of dry woods, Canada to Georgia.

30c ea. \$3.00 per 12 \$22.50 per 100

Pipsissewa

Pitcher Plant; Sidesaddle Flower

More interesting than beautiful, but with showy, reddish-brown blooms and pitcher green and brown leaves. Native of wooded bogs, Canada to Florida.

30c ea. \$3.00 per 12 \$22.50 per 100

Pitcher Plant

Quaker Lady; Bluets

Delicate, light blue flower is one of the joys of May. Prefers open wood and grassy slopes. Is native from Canada to Georgia and westward to Missouri.

30c ea. \$3.00 per 12 \$22.50 per 100

Bluets

Nursery Grown Wildflowers

Rattlesnake Plantain

Rattlesnake Plantain

Beautiful evergreen, pale green and white leaves make this plant a favorite the year round. Inconspicuous, whitish blooms appear in July and August. Native of dry woods, Maine to Florida, westward to Minnesota.

45c ea. \$4.50 per 12 \$32.50 per 100

Sarsaparilla

A smaller and less showy plant than the Giant Sarsaparilla but most desirable for its habit of adorning large boulders.

30c ea. \$3.00 per 12 \$22.50 per 100

Sarsaparilla, Giant

The rich, dark purple berries gleaming against the vivid green foliage of this plant make it a joy of the late summer woods. Delightful flower clusters appear earlier but are not so showy as the fruit.

45c ea. \$4.50 per 12 \$32.50 per 100

Giant Sarsaparilla

Saxifrage, Early

Most attractive when planted in masses along moist rocks. White flowers appear April, May, and June. Native in deep woods, Canada to Georgia, westward to Minnesota.

30c ea. \$3.00 per 12 \$22.50 per 100

Early Saxifrage

Sedum

Excellent cover for rocks, will grow in shade, thrive somewhat better in sun. Native of eastern United States.

25c ea. \$2.25 per 12 \$17.00 per 100

Sedum

Senna, Wild or American

Pea-like blossoms, tawny yellow of sunset hue, July and August. Leaves sensitive, light green. Stalks standing 3 to 7 feet high. Very satisfactory in most locations. Native of wet, open places, Massachusetts to North Carolina.

30c ea. \$3.00 per 12 \$22.50 per 100

Wild Senna

Shooting Star

Charming, orchid-purple flower rising from a rosette of flat, green leaves. Native of moist, shaly banks from Pennsylvania to Georgia.

30c ea. \$3.00 per 12 \$22.50 per 100

Shooting Star

Shortia

Excellent ground cover, waxy green leaves, white flower appearing April and May. Requires shade. Native of wooded mountains of the Carolinas.

30c ea. \$3.00 per 12 \$22.50 per 100

Shortia

Nursery Grown Wildflowers

Skunk Cabbage

Skunk Cabbage

The first bloom of spring, the actual flower is hidden beneath the gaily mottled, yellow, brown, green, and red hood. Large light green leaves follow the blossom. As the hood decays, an objectional odor is given off. The odor does not carry far and the plant is decorative and useful in some locations.

30c ea. \$3.00 per 12 \$22.50 per 100

Snakeroot, Black; Black Cohosh

An extremely desirable plant 3 to 8 feet high. Handsome, large, divided leaves, about which in July and August appear a tall plume of snowy white blooms. Native Maine to Georgia, westward to Wisconsin.

30c ea. \$3.00 per 12 \$22.50 per 100

Black Snakeroot

Snakeroot, White

Attractive plant, 1 to 4 feet high, with masses of white blooms appearing August, September, and October. Valuable for massed effect in wooded areas, but should not be planted in small garden. Said to be poisonous to cows. Native of rich woodlands, Canada to Florida, westward to Nebraska.

30c ea. \$3.00 per 12 \$22.50 per 100

White Snakeroot

Solomon's Seal

Fascinating plant, grows 1 to 3 feet high. Small, yellow-greenish blossom appears in May and is followed by charming, dark blue berries. Native of rich woodland from Ontario to Florida.

35c ea. \$3.25 per 12 \$23.50 per 100

False Solomon's Seal

Solomon's Seal, False; Wild or False Spikenard

One of the most beautiful and most satisfactory of the wild flowers. Handsome foliage and stunning plume of white flowers appearing May and June followed by handsome blue berries. Native of rich woodlands, Canada to North Carolina, westward to Wisconsin.

30c ea. \$3.00 per 12 \$22.50 per 100

Solomon's Seal

Spiderwort; Spider Lily

Unusual, beautiful, iris-like plant. Blooms, an exquisite purplish-blue, appear June, July, or August. Thrives best in rich soil of woodlands. Native from New York to Virginia.

30c ea. \$3.00 per 12 \$22.50 per 100

Pot Grown

50c ea. \$5.00 per 12 \$35.00 per 100

Spring Beauty

Spring Beauty, Carolina or Wide-leaved

Very delicate, pinkish-white flower. Makes a beautiful spring ground cover for moist woodlands. Native from Canada to North Carolina.

30c ea. \$3.00 per 12 \$22.50 per 100

Spiderwort

Nursery Grown Wildflowers

Yellow Star Grass

Star Grass, Yellow

Charming, grass-like plant. Bright yellow blooms appearing May and June, often again in August and September. Native in dry, open woods and fields, Canada to Florida.

Wintergreen, Creeping or Spicy; Checkerberry

Beautiful, low, evergreen creeper with white drooping flowers appearing June to September. Delicious, bright red berries and edible foliage. Grows well near or under evergreens. Native of woodlands from Canada to Georgia.

35c ea. \$3.25 per 12 \$23.50 per 100

Wintergreen, Round-leaved American

Many waxy, white flowers drooping from a stem 6 to 20 inches high rising from rounded leaves at its base. Blooms June to August. Native of rich, dry woods from Canada to Maryland.

35c ea. \$3.25 per 12 \$23.50 per 100

Wintergreen, Spotted

Charming evergreen, dark reddish-green leaves veined with white. Lovely clusters of white, bell-shaped flowers appear in July. Native of dry woods from Canada to Georgia.

35c ea. \$3.25 per 12 \$23.50 per 100

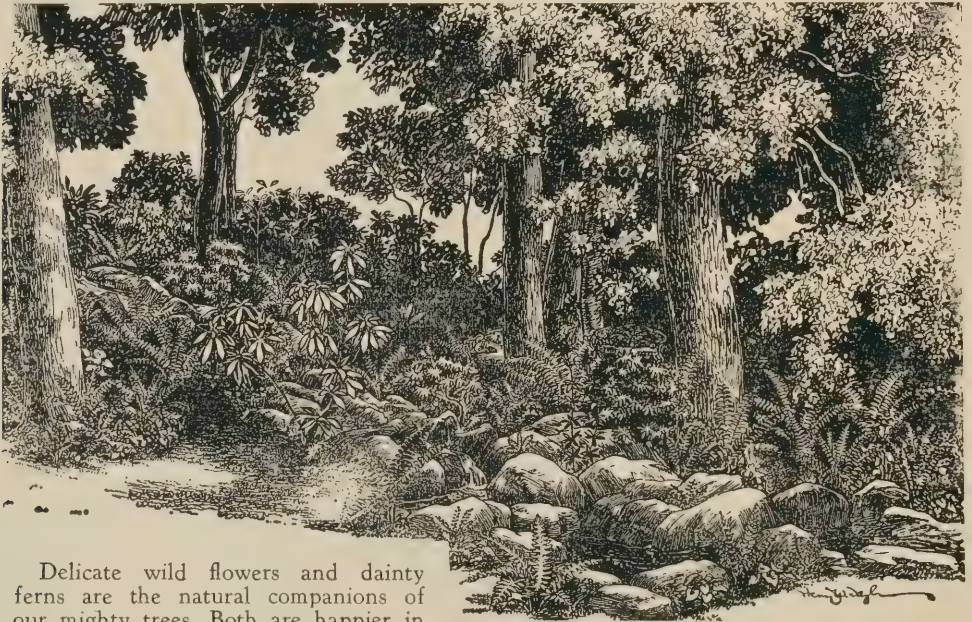

Creeping Wintergreen
Checkerberry

Round-leaved Wintergreen

Spotted Wintergreen

Delicate wild flowers and dainty ferns are the natural companions of our mighty trees. Both are happier in each other's company, for the proper wild flowers and native shrubs take nothing from the soil which the trees require, but assist in retaining the dead leaves which nature intended as the ideal mulch and food for the trees. An economical and beautiful garden with the smallest imaginable upkeep cost. Enjoy the glory of the deep woods in your own back yard. Rare and unusual native shrubs as well as the daintiest wild flowers and ferns should be happy beneath your own shade.

Nursery Grown Native Ferns

All Prices Quoted on Wildflowers and Ferns Include
Shipping Charges East of the Mississippi River

Beechfern

Beechfern

This attractive fern prefers the cool moisture of beech shade and grows naturally from Canada to North Carolina.

45c ea. \$4.50 per 12 \$32.50 per 100

Bracken, Eastern

Rather rank fern, spreads rapidly with root runners. Native of eastern United States on open hillsides and banks. Should never be planted except where large areas are to be covered.

30c ea. \$3.00 per 12 \$22.50 per 100

Eastern Bracken

Christmas Fern

Christmas Fern

Justly one of the most popular of all ferns. It retains its fronds well into the winter and often until the new fronds begin to uncurl in the spring. Prefers the deep, rich soil of heavily wooded slopes, grows naturally from Canada to Florida westward to Wisconsin and Texas.

30c ea. \$3.00 per 12 \$22.50 per 100

Cinnamon Fern

Grows 2½ to 3 feet in height. Fronds form beautiful, light green cone. Bears its spores on separate fronds and receives its name from their reddish brown color. Prefers the rich acid soil of stream banks. Native throughout eastern United States.

45c ea. \$4.50 per 12 \$32.50 per 100

Cinnamon Fern

Nursery Grown Native Ferns

Clubmoss

Clubmoss

A beautiful fern ally growing naturally from Canada to the Carolinas. Enjoys the cool shade of woods along streams and bogs. Is rather difficult to transplant.

30c ea. \$3.00 per 12 \$22.50 per 100

Grapefern

This beautiful fern prefers moist woods and slightly acid soil, grows naturally along the eastern coast from Canada to Florida westward to Michigan.

35c ea. \$3.25 per 12 \$23.50 per 100

Grapefern

Groundpine

Groundpine

Closely related to the ferns. Resembles a tiny pine tree. Likes wet wood and shady swamp edges. Grows naturally from Canada to Alabama. Is difficult to transplant.

30c ea. \$3.00 per 12 \$22.50 per 100

Ground Cedar

This dainty fern cousin naturally adorns the poor soil of dry, open woods from Canada to Alabama. Is difficult to transplant.

30c ea. \$3.00 per 12 \$22.50 per 100

Ground Cedar

Nursery Grown Native Ferns

Hay-scented Fern

Hay-scented Fern

Dainty, lace-like fronds. Spreads rapidly with root runners, should not be planted in limited areas. Excellent for ground cover on open, sunny banks, which it prefers. Native of eastern United States.

30c ea. \$3.00 per 12 \$22.50 per 100

Interrupted Fern

Grows 2½ to 3 feet in height. Interesting because it bears its dark brown spores on separate, small branchlets along the central part of the frond stem. Prefers the deep, rich soil of the woods along stream banks, grows in eastern United States.

45c ea. \$4.50 per 12 \$32.50 per 100

Interrupted Fern

Northern Lady Fern

Lady Fern, Northern

This handsome fern seeks the rich soil of the deep wood and should not be planted in the open sun. It grows naturally from Canada to southern Pennsylvania and westward to Missouri.

30c ea. \$3.00 per 12 \$22.50 per 100

Maidenhair Fern

The daintiest and probably the most popular of all native fern. Prefers the deep, rich soil of the dense woods. Native throughout eastern United States to Georgia and Louisiana.

30c ea. \$3.00 per 12 \$22.50 per 100

Maidenhair Fern

Nursery Grown Native Ferns

New York Fern

New York Fern

This dainty fern likes acid soil, wet woods, and shady bogs. Valuable ground cover. Spreads with root runners. Grows naturally from Canada to Georgia.

30c ea. \$3.00 per 12 \$22.50 per 100

Ostrich Fern

This tall, vigorously growing fern likes the deep, rich soil of wooded bottom lands, growing naturally from Canada to Virginia and westward to Alaska. Generally, it prefers shade, though it sometimes grows in the open sun, but in these cases usually the fronds brown early in the season.

45c ea. \$4.50 per 12 \$32.50 per 100

Ostrich Fern

Polypody

Polypody

Great mats of this beautiful fern grow luxuriantly over huge rocks or on steep banks. Prefers shade and grows naturally from Canada to Georgia.

30c ea. \$3.00 per 12 \$22.50 per 100

Rattlesnake Fern

Much daintier fronds than the Grapefern. Prefers open woods, bogs, slightly acid soil. Native of eastern United States.

30c ea. \$3.00 per 12 \$22.50 per 100

Rattlesnake Fern

Royal Fern

Royal Fern

The most graceful of all the large ferns flourishes in moist, acid soil. Native of eastern Canada, United States, and South America.

45c ea. \$4.50 per 12 \$32.50 per 100

Nursery Grown Native Ferns

Sensitive Fern

This handsome, showy fern should never be planted in a limited space because it spreads rapidly with root runners. However, it may be beautifully used along stream banks or in bogs where there is considerable area to cover. Native throughout eastern United States.

Sensitive Fern

30c ea. \$3.00 per 12 \$22.50 per 100

Spleenwort, Ebony

Dainty small fern, extremely hardy, very useful where space is limited, prefers the shade of a limestone section, grows naturally from Pennsylvania to Florida.

Ebony Spleenwort

30c ea. \$3.00 per 12 \$22.50 per 100

Walking Fern

This fascinating fern prefers limestone rocks in the deep woods, grows naturally from Canada to Georgia.

Walking Fern

30c ea. \$3.00 per 12

Woodfern, Evergreen; Marginal Woodfern; Leather-wood Fern

This beautiful and extremely popular fern retains its fronds well on into the cold weather. Prefers rich woodland slopes from Canada to Alabama and westward to Missouri.

Marginal Woodfern

30c ea. \$3.00 per 12 \$22.50 per 100

Prices on Larger Quantities of Wildflowers and Ferns Quoted Upon Request

Colorful SHRUBS

Flowering shrubs and trees to anyone's home. Colorful make a cheerful approach foliage, edible and non-edible fruits add still greater charm.

Winter makes more prominent the evergreens. More character and interest is added by the stems, trunks and limbs of the deciduous shrubs and trees.

Gracious TREES

Nursery Grown Native Shrubs

All prices quoted are for bare-rooted trees and shrubs. Additional charge is made for balling when necessary. No shipping charge east of the Mississippi River when sent by parcel post.

BALLING CHARGE

HEIGHT	DIAMETER OF BALL	
18-24 in.	10 in.	\$.50

10—12 ins.		\$ 2.00
2—3 ft.		\$ 4.00
3—4 ft.		\$ 5.00

Azalea, Flame

Brilliantly colored blooms ranging in shades from light yellow to deep orange appear usually in May, sometimes in June. Shows to best advantage in mixed plantings, especially where broad-leaved evergreens and hemlock are used.

8—12 ins.		\$ 2.00
1—2 ft.		\$ 4.00
2—3 ft.		\$ 6.00
3—4 ft.		\$ 8.00
4—6 ft.		\$ 10.00

Can you imagine a stream flowing thru a pasture; the banks steep and eroded; trees with their exposed roots dangling over the embankments; briars, grasses and underbrush above your head? This was the picture.

The drawing above is an accurate portrayal of this same spot with a naturalistic garden added. What a paradise! Planned and created by VICK'S WILDGARDENS, your conservators of Natural Beauty.

Vick's Wildgardens 10

Nursery Grown Native Shrubs

Pink Azalea

Azalea, Pink; Pinkster Flower

Beautiful, pink and white blossoms appearing usually in May. This vigorously growing shrub is a general favorite and fits in any woodsy setting. Blooms more profusely in filtered light in the shade of deep woods.

1—2 ft.	“	“	“	“	“	\$3.00
2—3 ft.	“	“	“	“	“	\$4.00
3—4 ft.	“	“	“	“	“	\$5.00
4—5 ft.	“	“	“	“	“	\$11.00

Azalea, White Swamp

Exquisite, white blooms appear April or May. Native of bogs and swamps. Prefers deep shade or filtered light.

2—3 ft.	“	“	“	“	“	\$4.50
3—4 ft.	“	“	“	“	“	\$6.00
4—5 ft.	“	“	“	“	“	\$7.50

White Swamp Azalea

American Bladder Nut

Bladder Nut, American

Tall, graceful shrub, delicate light green leaves. Dainty, white blossoms appear usually in May, followed by bladder-like seed pods. Interesting, striped bark on mature trunk. Prefers rich, moist soil. Thrives in woodland shade.

1—2 ft.	“	“	“	“	“	\$1.00
2—3 ft.	“	“	“	“	“	\$1.50
3—4 ft.	“	“	“	“	“	\$2.00
4—5 ft.	“	“	“	“	“	\$3.50
5—6 ft.	“	“	“	“	“	\$5.00

Buttonbush

Splendid, bog-loving shrub. White flowers appearing July and August. Thick, glossy, dark green leaves. Sometimes grows 8 to 10 feet high. Thrives in open or partially wooded, moist ground.

2—3 ft.	“	“	“	“	“	\$3.00
3—4 ft.	“	“	“	“	“	\$4.00
4—5 ft.	“	“	“	“	“	\$5.00

Buttonbush

Chokeberry, Black

Graceful shrub with glorious, white flowers appearing early spring followed by black berry-like fruit very attractive to the birds. Prefers moist rich woodlands.

18—24 ins.	“	“	“	“	“	\$.75
2—3 ft.	“	“	“	“	“	\$1.50
3—4 ft.	“	“	“	“	“	\$3.00

Black Chokeberry

Chokeberry, Red

Similar to the Black Chokeberry except that the fruit is red.

18—24 ins.	“	“	“	“	“	\$.75
2—3 ft.	“	“	“	“	“	\$1.50
3—4 ft.	“	“	“	“	“	\$3.00

Nursery Grown Native Shrubs

Red Twig Dogwood

Dogwood, Red Twig or Osier

Dramatically clings to the perilous slopes of stream banks, preventing erosion and adding charm and beauty with dainty clusters of white flowers followed by greenish-white fruit. Particularly attractive in winter because of its bright red twigs.

18—24 ins.	“	“	“	“	“	\$.75
2—3 ft.	“	“	“	“	“	\$1.50
3—4 ft.	“	“	“	“	“	\$2.00
4—5 ft.	“	“	“	“	“	\$4.50
5—6 ft.	“	“	“	“	“	\$6.00

Round-leaved Dogwood

Dogwood, Round-leaved

An ideal shrub for dry, limestone banks. Clusters of dainty, whitish flowers are followed by blue fruit.

2—3 ft.	“	“	“	“	“	\$3.00
3—4 ft.	“	“	“	“	“	\$4.50

Common Elder

Elder, Common

An inspiring shrub with showy, white blossoms followed by almost black berries. Will form a dense thicket, spreading by root runners. Prefers rich, moist ground.

2—3 ft.	“	“	“	“	“	\$2.00
3—4 ft.	“	“	“	“	“	\$3.50
4—5 ft.	“	“	“	“	“	\$5.00

Fothergillia

Fothergillia

This is often called a Dwarf Alder, growing 2 to 5 feet high. Pinkish white blooms appear in April. It is a native of the southern states but is reported hardy much farther north.

2—5 ft.	“	“	“	“	“	\$3.00
---------	---	---	---	---	---	--------

Black Haw

Haw, Black

An interesting shrub with dainty blossoms and almost black fruit. Plum-shaped leaves. Prefers the rich soil of well drained woody slopes.

3—4 ft.	“	“	“	“	“	\$2.50
4—5 ft.	“	“	“	“	“	\$3.50

Dotted Hawthorn

Hawthorn, Dotted

Very similar to Cockspur Thorn. Fruit is red or yellow, dotted with brown. Prefers rich meadow land of stream banks.

3—4 ft.	“	“	“	“	“	\$2.50
4—5 ft.	“	“	“	“	“	\$3.50

Hazelnut

This handsome and decorative large shrub or small tree is a familiar sight over a wide area of eastern United States in rich meadow lands or along stream banks where the soil is deep and fertile. It transplants readily when small. Its fruit is an universal favorite.

1—2 ft.	“	“	“	“	“	\$1.50
3—4 ft.	“	“	“	“	“	\$2.50
4—5 ft.	“	“	“	“	“	\$4.00
5—6 ft.	“	“	“	“	“	\$5.50

Hazelnut

Hazelnut

Nursery Grown Native Shrubs

Hercules Club

Hercules Club

Decorative, rapid-spreading shrub. Beautiful clusters of creamy white flowers, black berries. In spite of its charm it should be used carefully and not planted where it will dominate other shrubs.

2—3 ft.	/	/	/	/	/	\$1.00
3—4 ft.	/	/	/	/	/	\$3.00

Hobble-bush

Beautiful, white flowers in snowy clusters followed by reddish-purple berries, thick, leathery foliage. This interesting shrub is a native of the cool shade of our hemlock forests.

2—3 ft.	/	/	/	/	/	\$2.00
3—4 ft.	/	/	/	/	/	\$3.00

Hobble-bush

Deciduous Holly

Holly, Deciduous; Winterberry

A handsome show in fall with clusters of bright red berries which hang on well into early winter. Grows naturally in rich, open bogs.

2—3 ft.	/	/	/	/	/	\$2.00

Dwarf Sumach

Nursery Grown Native Shrubs

Sweet Fern

Sweet Fern

Charming, sweet-smelling shrub with fern-like leaves. Prefers poor, loose, acid soil. It is very difficult to transplant.

1—2 ft. \$1.50

Thorn, Cockspur

Tall, vigorous shrub. Prefers rich, moist soil. Long spurs. Excellent for pasture hedge.

2—3 ft. \$3.00

3—4 ft. \$4.00

Thorn, Scarlet

Excellent shrub. Especially desirable because of its showy, scarlet fruit.

2—3 ft. \$3.00

3—4 ft. \$4.00

Thorn, Washington

Similar to Scarlet Thorn. Bright red fruit. Usually considered the best American Thorn.

2—3 ft. \$3.00

3—4 ft. \$4.00

Washington Thorn

Washington Thorn

Viburnum, Maple-leaved

Blooms profusely. Clusters of white flowers are followed by almost black fruit. Foliage turns a beautiful mauve pink in autumn. Thrives best in deep shade of rich woodlands.

2—3 ft. \$2.00

3—4 ft. \$3.00

Viburnum, Round-leaved

2—3 ft. \$2.00

3—4 ft. \$3.00

Waahoo

A beautiful euonymus. Bright red fruit in autumn. Prefers deep, rich soil and thrives in the open sun.

1—1½ ft. \$1.50

1½—2½ ft. \$2.50

2½—3½ \$3.50

Waahoo

Witch Hazel

Late fall or winter blooming shrub. Fringe-like, yellow blossoms. A handsome plant for cool, moist woods.

2—3 ft. \$1.75

3—4 ft. \$2.25

4—5 ft. \$3.00

5—6 ft. \$5.00

Witch Hazel

Yew, American or Canadian

Dark, rich green foliage. Spreads close to the ground. One of the finest of all yews. Grows naturally amongst moist rocks along shady or partially shady banks or in the deep, moist woods.

6—8 ins. \$2.00

12—18 ins. \$3.50

American Yew

Nursery Grown Native Trees

All prices quoted are for bare-rooted trees and shrubs. Additional charge is made for balling when necessary. No shipping charge east of the Mississippi River when sent by parcel post.

BALLING CHARGE

18-24 in.	10 in.....	\$.50
3-4 ft.	14 in.....	1.25
4-6 ft.	16 in.....	1.90
6-8 ft.	18-24 in.....	3.05

Isolated trees on fine lawns frequently suffer from malnutrition. They are deprived of nature's food supply which the more fortunate trees of the woods enjoy. They are unable to secure the rich mulch of decaying leaves and twigs which should protect their tender roots during the cold winter and later become their most prized food. Vick's Wildgardens will examine your trees and suggest feeding if necessary. It is possible to order from us the tree food you need. See page 52.

Arbor Vitae

Arbor Vitae

A pyramidal tree with tiny branches and leaves growing in a vertical position. An extremely ornamental, evergreen, and very valuable tree, transplants readily, grows 50 to 60 feet high. Contrary to the popular belief, this tree prefers marshy ground of Maine and Canada.

2—3 ft.	/ / / / /	\$3.10
4—5 ft.	/ / / / /	\$5.50

Arbor Vitae

American Mountain Ash

Ash, American Mountain

A tree of rather formal shape with a graceful, somewhat slender outline, seldom growing to a height of more than 30 or 40 feet. One of the most charming trees of our entire flora and one of the most popular for home grounds. It transplants readily and merits its high esteem by its beautiful, feathery foliage, delightful spring flowers and abundant, bright red fruit which appears in the summer or early autumn. Native of the mountainous regions from northern Georgia well up into Canada.

White Ash

Basswood

Growing alone, the Basswood assumes a rather regular, somewhat pyramidal form with a beautifully domed crown, attaining a height frequently of 100 feet and a 3 to 4 foot diameter. It prefers moist, low lands. It grows daringly close to stream banks. It is always a tree of rare beauty and grace. Fragrant, yellow flowers blooming in mid-summer. Grows from Maine to central Alabama, westward to Oklahoma and North Dakota.

2—3 ft.	\$1.50
3—4 ft.	\$2.00

Basswood

Basswood

Beech

The Beech is magnificent with a tremendous, smooth-barked, gray trunk and huge wide-spreading branches, crowned with an artistically delicate tracery of twigs which form a regular shape and offers support for an extremely dense canopy of dark green leaves. It frequently grows to a height of over 100 feet with a straight trunk 3 to 4 feet in diameter. It prefers fertile, well-drained soil and has a mat of deep and widely spreading roots. It grows from Maine to Florida, westward to Texas and through part of Wisconsin.

Coffee Tree

Coffee Tree

This truly American tree is so outstandingly beautiful with its dainty foliage and rough, gray bark, one wonders why it is not more commonly used for ornamental planting. It grows 100 feet high with a trunk often 4 feet in diameter and offers high shade for lawns. It should be transplanted when small. The Coffee Tree ranges naturally through western New York, western Pennsylvania, West Virginia, Tennessee, through most of Alabama and northward to southern Wisconsin.

5—7 ft.	\$6.00
---------	---	---	---	---	---	--------

Coffee Tree

Crab-Apple, American

This low, round-headed, decorative tree is generally a favorite wherever it appears. It grows most naturally from Canada through western New York to Georgia, west to Arkansas and Iowa. It seldom grows to a height of more than 24 feet. Prefers rich, well-drained soil and grows in the woods where its light pink blossoms are beautifully set off against the background of the taller trees.

4—5 ft.	\$5.00

American Crab-Apple

American Crab-Apple

Nursery Grown Native Trees

Flowering Dogwood

The Dogwood is the showiest and most dramatic as well as probably the most popular and beautiful of all the American trees. Low, round-headed when given a chance to spread, seldom growing to a height of more than 40 feet with a trunk greater than a foot in diameter. It prefers well-drained, fertile soil as it blossoms more profusely in the open, and transplants readily at almost any size. The large, beautiful, white flowers of spring are followed by rich green, round foliage which turns brilliant scarlet in the autumn. The fruit colors bright red usually before the leaves turn and is an attractive food for many birds. It grows naturally from central New York to northern Florida and westward to eastern Texas and eastern Iowa.

Elm, White

High, gracefully spreading head, interlaced branches and “Y” crotches make the crown of the Elm unmistakable when silhouetted on the horizon. The American or White Elm is one of our most graceful and beloved trees. It frequently attains a height of 100 to 125 feet and has a huge rough-barked trunk, 6 to 10 feet in diameter; its branches divide in an unusual vase-like form. Grows fairly rapidly when planted 6 to 10 feet in height. It is found from northern Maine, southward through a large part of Florida and Texas, and westward to the western border of Montana and Wyoming. Its natural habitats are rich bottom lands and stream banks.

Fringe Tree

Nursery Grown Native Trees

Sour or Black Gum

Gum, Sour or Black

This handsome tree with its irregular, pagoda-shaped crown, rises often to a height of 100 feet with a trunk 3 to 4 feet in diameter. It naturally prefers swamps and rich lowlands but will grow anywhere in company with Red Maple and most of the trees which like deep, fertile soil. It is difficult to transplant unless moved when comparatively young.

2—3 ft.	\$2.50
3—4 ft.	\$3.50

Sour Gum

Sweet Gum

Gum, Sweet

This magnificent tree grows to the height of 140 feet with a trunk 4 to 5 feet in diameter, a handsome, irregular-shaped crown, and star-shaped leaves which turn rich purple in autumn. It is often refused a place on the home grounds because it is rather slow to get started and difficult to transplant when it has attained any size. It grows naturally in the lowlands and ranges from southern New York, southward through a large part of Florida, westward to the central part of Texas and Missouri.

Sugar Maple

Maple, Sugar

This wonderfully stately tree with its pyramidal crown grows to a height of somewhat over 100 feet with occasionally a trunk 5 feet in diameter. It is undoubtedly the most desirable of all Maples, beloved for its large, yellow or bright red foliage in autumn and prized for its delicious maple syrup. Transplants readily. This tree much prefers deep fertile soil and ranges over the entire eastern part of the United States.

4—6 ft.	“	“	“	“	“	\$4.50
---------	---	---	---	---	---	--------

Black Oak

Oak, Black

The Black Oak is sometimes called the Yellow Oak and is a distinguished and extremely handsome tree with a more or less regular crown. It is one of the most showy and beautiful of the Oaks, growing sometimes to 100 feet in height with dark, firmly ridged bark outside and distinctly yellowish, within. Can be transplanted, but not readily as the Pin Oak. It ranges from central Maine to northern Georgia, westward to Texas and Minnesota.

1—1½ ft.	“	“	“	“	“	\$1.50
2—3 ft.	“	“	“	“	“	\$2.50

Pin Oak

Oak, Pin

This particular distinct variety of Oak is extremely popular for street and lawn planting. It sometimes grows 70 to 80 feet in height; has a smooth bark and develops a single leader with a multitude of small branches whorled about this stem. It naturally grows in deep, rich soil on the banks of streams and ponds, but does extremely well in almost any environment. Ranges from central Pennsylvania to southern Tennessee, westward throughout most of Missouri. Transplants well almost any size.

Red Pine

White Pine

Pine, White

This magnificent monarch of the forest is stately and beautiful with its pyramidal crown and iridescent green foliage the entire year around. Grows frequently to a height of 180 to 200 feet with a trunk 4 to 5 feet in diameter. It transplants readily and is attractive at all stages. Grows naturally from far up in Canada, throughout the New England States, New York, most of Pennsylvania, southward along the Appalachian Mountains to Tennessee.

1½—2 ft.	\$2.50

White Pine

American or Wild Plum

Plum, American or Wild

This beautiful, low, round-headed tree seldom grows more than 25 or 30 feet in height. It is a favorite for its masses of beautiful blossoms in the spring and its delicious fruit later in the season. Grows naturally over a wide area of rich, moist lands from Massachusetts and central New York, southward almost to central Florida.

1—2 ft.	\$1.00

American or Wild Plum

Red-bud

Red-bud

This small, artistic, round-headed tree occasionally grows to a height of 45 feet. Its exquisite profusion of pink flowers form a beautiful contrast in the early spring with the white flowers of the Dogwood. It prefers rich, fertile ground and will grow either in the shade or in the open. Grows throughout most of Pennsylvania, southward along the foothills to Georgia, Alabama, and Mississippi, westward to Oklahoma, Kansas, and Nebraska.

2—3 ft.	\$2.00	5—6 ft.	\$5.50
3—4 ft.	\$3.00	6—8 ft.	\$7.50

Red-bud

Sassafras

Sassafras

This tree with an angular crown and fascinatingly variegated foliage is a familiar sight from central Vermont to central Florida, westward to Texas, Kansas, and Iowa, interesting at all times of the year—beautiful blossoms and dark blue almost purple fruit, bright yellow foliage in the autumn—enough cannot be said in its favor. It attains a height of 80 to 90 feet with a trunk 4 to 6 feet in diameter.

1—3 ft.	\$1.00
3—4 ft.	\$2.00
4—6 ft.	\$4.50

Sassafras

Nursery Grown Native Trees

Sour Wood

Sour Wood

This rather irregularly crowned tree, which seems to actually blaze with color in the autumn, frequently grows to a height of 50 feet. It prefers fertile slopes. Transplants easily, and its use should ever increase. It has wonderful white blossoms and its brilliant fall foliage is unsurpassed. Grows from central Pennsylvania, westward to central Arkansas, southward to northern Florida and eastern Texas.

Sour Wood

Sycamore

Sycamore

This rugged tree with magnificent, horizontal limbs frequently grows to a height of 125 feet with a trunk diameter of 10 to 12 feet and sometimes isolated specimens have over a 100 foot spread. Grows in deep, rich, moist soil along stream and river banks from central Maine to Florida and westward throughout the Mississippi Valley.

Sycamore

Tulip Tree

Tulip

This stately tree grows tall and straight as an Indian with its erect trunk sometimes branchless to a height of 100 feet. It belongs to the Magnolia family and is one of our most magnificent flowering trees. From southern central New York to Florida and westward to the Mississippi, usually the tallest tree in the woods is the Tulip, frequently rising to a height of 180 to 190 feet with a trunk occasionally over 12 feet in diameter.

Tulip Tree

Black Walnut

Walnut, Black

This splendid American giant frequently raises its crown to the height of 100 to 150 feet with a trunk diameter of 5 to 6 feet. Grows from Massachusetts and central New York, along the slopes of the Appalachian Mountains to Alabama, westward into Texas, and northward to Nebraska and Wisconsin.

Naturalistic

LANDSCAPING
SERVICE

NATURALISTIC LANDSCAPING is truly a specialty—a specialty which requires ability, artistry and quality workmanship. It is important to have a close understanding of what actually is most “fitting” for your particular garden. There is a warm relationship between well planted grounds and your type of home. Natural gardens actually have the greatest amount of simplicity. They require but little maintainance. Such gardens are executed with the idea of an all year round picture. Planting with composition, color and harmony in mind, breaks the monotony and gives you something interesting to look forward to as the seasons approach. Gardens of this type are developed by appropriations which meet your budget.

The work of VICK'S WILDGARDENS is known thruout the eastern United States. Examples of our natural settings can be seen each year at the Philadelphia Flower Show. Our objective on your property is to plan and create a real effect for long-lasting enjoyment. Our workmen are artists, skillfully trained, and above all have a true love for their work and their accomplishments.

Below is a WOODLCT ravine with a pool held by a straight concrete dam. The opposite page shows the same dam changed with huge boulders, ferns, native shrubs, and drifts of wild flowers into a paradise with the mellowness of having always belonged.

Dramatic

WATERFALLS

A Dream Come True!!

Fascinating, soothing water music, ripples, waterfalls and enchanting pools can be had with your ordinary household water supply. Push a button, presto! you have it. (Note: it is possible to use this water over and over again to avoid waste and stagnation.)

These grand creations are made by our specialists to look like a stream, pool, or waterfall in the mountains. We depend on your local plumbers and electricians to make the necessary connections and the rest you leave to us. Such novelties can not only be had in your garden, but also within your very home. For example: that conservatory, bay window, sun porch or greenhouse may lend itself to this added feature. Your ideas as well as ours help make your home a better and more delightful place in which to relax.

A touch of Nature intimately placed pays big dividends on a small investment and reduces up-keep.

Henry J. Taylor

VICK'S WILDGARDENS, although specialists in Naturalistic creations, realize that some grounds do not lend themselves readily to this type of artistry. With this in mind we offer a COMPLETE planting service—one which will place your home in its proper setting. This would include the planting of flowers, shrubs, and trees, building of lawns, and small scale grading.

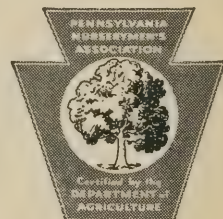

Your particular problem might well be solved by one of our specialties:

- WILDGARDENS
- NATURALISTIC ROCKERIES
- DRAINAGE CORRECTIONS
- NATURAL DAMS, POOLS, AND WATERFALLS
- ARTISTIC STEPS, WALKS, BRIDLEPATHS, WALLS,
- BRIDGES, PATIOS AND TERRACES

Members of:

- AMERICAN ASSOCIATION OF NURSEYMEN
- PENNSYLVANIA NURSEYMEN'S ASSOCIATION
- NATIONAL LANDSCAPE NURSEYMEN'S ASSOCIATION
- PENNSYLVANIA HORTICULTURAL SOCIETY
- PHILADELPHIA FLOWER SHOW, INC.

For conserving existing beauty, your priceless shrubs, fruit and ornamental trees are worthy of the best scientific treatment.

We do:

Feeding

Pruning

Cabling

Cavity work

Dusting for control of insect pests.

It is Good Economy to Have Your Work Properly
Planned and Skillfully Executed

In addition to our regular service, we now offer a consulting department which will be glad to render free advice concerning native plants and naturalistic landscaping. This is done when the plants are purchased from, or work is done by Vick's Wild-gardens. Expense charges are made where distant travel is involved. Nominal charges are made for those who desire only our technical and horticultural advice.

Individuals

WE are sure that plants are individuals with distinct individualities. Some of these individuals can be transplanted much more readily than others of the same species. Some respond differently to the same environment. It is our privilege and our joy to study the reaction of many plants to various changes and to help individual plants as well as groups of plants gain strength and vigor. We like to feel that these plants which we have assisted nature in raising are finding a new home where they will be happy and well cared for. Therefore, we ask you to keep them thoroughly watered during the hot dry spells in summer and to "send your evergreens into the winter wet." Keep your wildgarden free of undesirable weeds, thistles, ragweed, nettles, poison ivy and Japanese honeysuckle, which are a few of your serious menaces. Do not pile heaps of leaves on your wildgarden in the fall. Do not remove the natural fall of leaves from the wildgarden in the spring. Remember even the tiniest plant is used to coming up through natural leaf fall when it wakes up in the spring. It needs those leaves for mulch and later on for food. Do not cultivate your wildgarden. The roots are delicate and generally close to the surface and are easily disturbed.
